

WE ARE HIRING IN INDIANAPOLIS!

We are looking for two interested, motivated candidates to join our team following recent retirements!

The Indiana Poison Center is the only accredited regional poison center for the State of Indiana. We are based at Indiana University Health Methodist Hospital and are affiliated with the IU School of Medicine. Our medical toxicology service rounds at four hospitals in downtown Indianapolis, seeing over 700 patients per year at bedside, and maintains a highly active rotation for emergency medicine, pediatric, and internal medicine resident physicians as well as pharmacy residents from IU Health and students from Purdue School of Pharmacy and Butler University College of Pharmacy & Health Sciences.

There are full-time and part-time positions available. We offer a competitive salary and a full benefits package from IU Health. Both positions are evening shift, with occasional day or night shift duties as staffing needs dictate. We are an AAPCC-accredited poison center with a dynamic, dedicated staff, all of whom are CSPI credentialed or eligible. Applicant must be a licensed RN with critical care or ED experience. CSPI is preferred but we will happily train. DABAT credentialing is a plus.

The Indiana Poison Center is located near the heart of downtown Indianapolis. We have a variety of opportunities for outdoor recreation, sports, the arts, and a flourishing foodie and craft beer scene. We are centrally located in the state, less than 3 hours' drive from Chicago and Cincinnati, and have a very affordable cost of living. Come find out why Indy is one of America's most underrated cities!

To apply, please contact:

Adam G. Overberg, PharmD, BCPS, DABAT
Director, Indiana Poison Center
IU Health Methodist Hospital, Room B402
1701 N. Senate Ave, Indianapolis, IN 46202
