National Poison Data System (NPDS) Bulletin
COVID-19 (Hand Sanitizer)

Results: According to data retrieved from the National Poison Data System (NPDS), there were 28,323 Hand Sanitizer exposure cases reported to the 55 U.S. Poison Control Centers (Jan. 1, 2021 through Oct. 31, 2021), which resulted in an increase of 56% compared to the same time before the COVID-19 pandemic (2019).
