

Poison Control Center Pharmacist Position Available: Toxicology Management Specialist

Job Title: Toxicology Management Specialist (Pharmacist SR EX)

**Work Location: California Poison Control System
Sacramento Division
UC Davis Health, Sacramento CA**

Duties: The California Poison Control System provides over the phone information to California health care professionals, and to the general public, regarding the diagnosis, assessment and treatment of poisoning or potential poisoning.

Successful applicants will join our state-wide multidisciplinary poison control team, which provides telephone advice and information across a broad spectrum of toxicology topics including poisoning related to drugs, household chemical exposures, substances of abuse, plants, venoms, and environmental chemicals. It's a new adventure every day!

Employment is with the UCSF School of Pharmacy. Opportunities exist for research and academic publication. *Poison Control Center experience is not required. Extensive on-the-job training will be provided.*

The Sacramento Region of California's central valley is a culturally diverse and sophisticated community where residents enjoy access to big-city amenities in close proximity to world-renowned hiking, skiing, and coastal regions. Enjoy the best of what our great state has to offer!

Required Qualifications

- Pharm.D. Degree with CA Licensed Pharmacist in good standing currently or by the time of starting. Minimum of 2 years of experience in clinically-oriented pharmacy practice OR 2 years prior Poison Control Center experience or an equivalent combination of education and experience.
- Excellent drug information skills and knowledge of pharmacology and pathophysiology
- Knowledge of the proper use of back-up medical consultants
- Experience with and a thorough understanding of potential interactions between drugs and disease states
- Written and verbal communication skills must be superb in English and adaptable to situations involving callers ranging from children and the lay public to healthcare professionals
- Will work an average of 80 hours over each 2-week period, which includes sharing days, evenings, nights, weekends and holidays. Shift length: 10.5 hour shifts with 1 hour meal period.

Preferred Qualifications

- Post graduate or clinical pharmacy residency or fellowship training
- AAPCC Certification as Specialist in Poison Information (CSPI) or Diplomat of American Board of Applied Toxicology (DABAT)
- Prior emergency medicine or critical care clinical pharmacy experience
- Experience with study design, study-data analysis, and manuscript preparation
- Formal teaching experience of clinical learners
- Multilingual

Compensation: Full-time, salaried position with excellent benefits provided through the University of California. Salary commensurate with experience.
