

American Association of Poison Control Centers

Opioid Data
August 31, 2020

These numbers reflect the closed human exposures to opioids reported to poison centers as of August 31, 2020. The numbers may change as cases are closed and additional information is received.

Year	Number of Cases
2011	86,477
2012	83,941
2013	78,107
2014	75,292
2015	73,745
2016	74,795
2017	69,348
2018	61,139
2019	58,641
2020	36,821

2020 by Month	Number of Cases
January 2020	4,991
February 2020	4,838
March 2020	4,552
April 2020	3,982
May 2020	4,532
June 2020	4,551
July 2020	4,694
August 2020	4,681
September 2020	
October 2020	
November 2020	
December 2020	
Total	36,821

Total	73,745	75,292	78,107	83,941	86,477

Please note: American Association of Poison Control Center data for this year and last is considered preliminary because it is possible that a poison center may update a case anytime during the year if new information is obtained. In the fall of each year, the data for the previous year is locked, and no additional changes are made.

The term “exposure” means someone has had contact with the substance in some way; for example, ingested, inhaled, absorbed by the skin or eyes, etc. Not all exposures are poisonings or overdoses.
