

## **The Oregon Poison Center is looking for you!**

The Oregon Poison Center has a Clinical Nurse Manager position open!

The Oregon Poison Center (OPC) is the designated regional poison center serving Oregon, Alaska, and Guam. Our center is located on the campus of Oregon Health & Science University (OHSU).

OHSU is Oregon's only academic medical center, and it includes the top-ranked adult and children's hospitals in Oregon. OHSU has Schools of Medicine, Nursing, Dentistry and Pharmacy as well as major research institutes. The OPC serves as a professional training site for various healthcare disciplines. Our SPI staff includes RNs and Pharmacists, and we are expanding our staffing levels. We have nine medical toxicologists on staff and host an active toxicology fellowship program. This is an exciting and challenging opportunity to impact the diverse communities in our service region.

We seek an experienced Nurse Manager with a bachelor's degree in nursing and a master's degree in place or in progress in a healthcare and/or business-related field; two or more years in a recent managerial/supervisory role; five years RN experience. Of the five years, one or more year's experience should be in a nationally certified poison center.

Portland offers big-city excitement and small-town charm. Situated close to the Pacific Ocean, the spectacular Columbia Gorge and Mt. Hood, Portland offers a multitude of opportunities for an active lifestyle. We have a fabulous, eclectic food scene and world-class wines!
