AAPCC makes every attempt to ensure that the publicly available data on AAPCC.org is timely and accurate. Additionally, AAPCC continuously works to update the AAPCC Generic Code structure to better serve the surveillance and coding needs of our members. Please note that the increased e-cigarette numbers reflect recent changes to the e-cigarette generic code hierarchy. This update may affect the number of e-cigarette cases reported from January 2011 through December 2016.

Electronic Cigarettes and Liquid Nicotine Data

January 31, 2020

These numbers reflect the closed human exposures to e-cigarettes and liquid nicotine reported to poison centers as of January 31, 2020. The numbers may change as cases are closed and additional information is received.

Please note: American Association of Poison Control Center data for this year and last is considered preliminary because it is possible that a poison center may update a case anytime during the year if new information is obtained. In the fall of each year, the data for the previous year is locked, and no additional changes are made.

The term “exposure” means someone has had contact with the substance in some way; for example, ingested, inhaled, absorbed by the skin or eyes, etc. Not all exposures are poisonings or overdoses.
